No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 43,

Sequence 35, Application US/09352159A

Patent No. 621434

Patent No. 6214434

CERNERAL INFORMATION:

APPLICANT: Duvick, Jonathan P.

APPLICANT: Maddox, Joyce R.

TITLE OF INVENTION: Amino Polyol Amine Oxidase

TITLE OF INVENTION: Polynucleotides and Related Polypeptides and Methods of Use

FILE REFERENCE: 134

CURRENT APPLICATION NUMBER: US/09/352,159A

CURRENT FILING DATE: 1999-07-12

EARLIER FILING DATE: 1999-07-25

EARLIER FILING DATE: 1999-07-25

EARLIER APPLICATION NUMBER: 60/092,336

EARLIER FILING DATE: 1999-07-25

EARLIER APPLICATION NUMBER: 60/0135,391

EARLIER FILING DATE: 1999-05-21

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 41, 4, Application US/09352159A

Patent No. 6211434
GENERAL INFORMATION:
APPLICANT: Duvick, Jonathan P.
APPLICANT: Gilliam, Jacob T.
APPLICANT: Maddox, Joyce R.
TITLE OF INVENTION: Amino Polyol Amine Oxidase
TITLE OF INVENTION: Polynuclectides and Related Pol;
FILE REFERENCE: 1134
CURRENT APPLICATION NUMBER: US/09/352,159A
CURRENT FILING DATE: 1999-07-12
CURRENT FILING DATE: 1998-07-25
; EARLIER FILING DATE: 1998-07-25
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     GCAGCATAG 1929
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 6
US-09-352-159-41
                                                                                                                                                                                                                                            1440
                                                                                                                                                                                                                                                                1501
                                                                                                                                                                                                                                                                                     1500
                                                                                                                                                                                                                                                                                                                                                                   1620
                                                                                                                                                                                                                                                                                                                                                                                      1681
                                                                                                                                                                                                                                                                                                                                                                                                          1680
                                                                                                                                                                                                                                                                                                                                                                                                                              1741
                                                                                                                                                                                                                                                                                                                                                                                                                                                 1740
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1800
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             1861

Patent No. US20020142981A1

GENERAL INFORMATION:

APPLICANT: HORNE, Darci T.

APPLICANT: Cockley, Joseph G.

APPLICANT: Gene Logic, Inc.

TITLE OF INVENTION: Gene Expression Profiles in Liver Cancer;

FILE REFERENCE: 44921-5028-WO

CURRENT FILING DATE: 2001-66-14

PRIOR APPLICATION NUMBER: US 60/211,379

PRIOR APPLICATION NUMBER: US 60/211,379

PRIOR APPLICATION NUMBER: US 60/211,379

PRIOR FILING DATE: 2000-10-14

PRIOR FILING DATE: 2000-10-02

NUMBER OF SEQ ID NOS: 3950

SOFTWARE: PATENTIN VEY: 2.1

LENGTH: 1949
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
